

NAME

go-md2man – Convert markdown files into manpages

SYNOPSIS

```
go-md2man -in=[/path/to/md/file] -out=[/path/to/output]
```

Description

go-md2man converts standard markdown formatted documents into manpages. It is written purely in Go so as to reduce dependencies on 3rd party libs.

By default, the input is stdin and the output is stdout.

Example

Convert the markdown file "go-md2man.1.md" into a manpage.

```
go-md2man -in=go-md2man.1.md -out=go-md2man.1.out
```
