

**NAME**

go-md2man - Convert markdown files into manpages

**SYNOPSIS**

```
go-md2man -in=[/path/to/md/file] -out=[/path/to/output]
```

**Description**

go-md2man converts standard markdown formatted documents into manpages. It is written purely in Go so as to reduce dependencies on 3rd party libs.

By default, the input is stdin and the output is stdout.

**Example**

Convert the markdown file "go-md2man.1.md" into a manpage.

```
go-md2man -in=go-md2man.1.md -out=go-md2man.1.out
```
