(12:05:21) **Chelsea Graham**

Hello, I require help determining the ink on my labels and if they are safe to be submerged in alcohol or on the outside of jars containing alcohol. The product code on my order is E35-C10884 Plus I have this additional information:

Base Substrate: CILS-8100M Matt White Polyester

Adhesive Type: Permanent Solvent Acrylic

(12:06:44) **** Lewis Manville joined the chat ****

(12:07:10) **Lewis Manville**

Hi Chelsea, Thank you for getting in touch

(12:08:58) **Lewis Manville**

Just a question how long will they be submerged in alcohol for?

(12:10:28) **Chelsea Graham**

These would be accompanying specimens preserved in alcohol in jars, so the idea is that they would be submerge in alcohol for ever. (Hopefully have a long lifespan, so context of the specimen would not be lost).

(12:14:43) **Lewis Manville**

Yes, the labels and ribbon are alcohol resistant but for something this specific then we would always recommend the end user to test

(12:15:12) **Chelsea Graham**

Can you please confirm the ink for me? I can't seem to find that information.

(12:16:04) **Lewis Manville**

the ribbon is our own ribbon which is our CILS-TTR-ARA1-110/300 and this is a resin ribbon

(12:20:05) **Chelsea Graham**

Thank you, Lewis. Are there any spec sheets that you may be able to provide about the ink, adhesive, or base substrate?

(12:21:08) **Lewis Manville**

Yes i can send over a datasheet for the labels and ribbon. Would you be looking at purchasing some more for this study. We can supply blank labels with the correct ribbon for you to print in house.

(12:22:55) **Chelsea Graham**

I think that my colleague wants to know if she can use these labels with some botanical specimens that are preserved in alcohol. We have only been using them on the botanical sheets with pressed

flowers so far. We may want to test if this works and then perhaps we could look to order more in the future, but I don't suspect that will be for a year or so, most likely.

(12:23:57)

Chelsea Graham

I would really appreciate it if you could send those spec sheets for me to provide for my colleague at the Herbarium. My email address is chelsea.graham@snm.ku.dk

(12:26:12)

Lewis Manville

Hi Chelsea i am going to send the datasheets over to you now thank you,

(12:28:11)

Chelsea Graham

Thank you very much. I appreciate that. Have a nice day!

(12:28:30)
