                                Select Field in Record Format

Database file . . . . . : QAFCPFDDTA
Library . . . . . : QGPL
Record Format . . . . . : PRODMASTER

Type option, press Enter.
1=Select

Opt Field           Length Type Text
  1  NAME                15      C   Product name
     CODE                 8       C   Product code
     NATION               15      C   The country name developed
     PRICE                3,0     P   Product price
     AMOUNT               4,0     P   Amount of stock

                                Bottom

F5=Refresh  F11=Select reserved variable  F12=Cancel

```

You can select the field in a record format by typing a 1 (Select) in the *Opt* column.

Example Actions:

1. Type 1 in the *Opt* column beside NAME.
2. Press the Enter key.

The Define Text Detail display appears again with the selected field name in the *Text data* prompt.

```

                                Define Text Detail

Mark: *T003           Measurement method: Row/Column

Type choices, press Enter.
